

## PRINT DEVIATION AGREEMENT

According to standard print specifications, screen print of Compact Disc and CD ROM product does not extend all the way to the center hole or stacking ring area. The artwork begins 45mm from the center hole and extends out to 116mm. This is called Standard Point.

To print to the center hole and avoid printing over the stacking ring area, screen print artwork should start no closer than 20mm from the center and end at 32mm from the center and begin again at 36mm and continue to 116mm. In this way, the printed image area between 32mm and 36mm is knocked out, resulting in a 2mm "band" without print to allow for the stacking ring. This is called Print-to-Center with a knockout for stacking ring.

**Printed images extending to the center hole, over the top of the stacking ring of a standard disc, may result in print voids and/or inconsistent print in this stacking ring area. This is called Print-to-Center with a knockout for the stacking ring.**

**MUSICTODAY.COM WILL PRINT-TO-CENTER WITHOUT A KNOCKOUT FOR THE STACKING RING ON A STANDARD DISC ONLY UNDER THE FOLLOWING CONDITIONS:**

- THE CUSTOMER SIGNS THIS PRINT DEVIATION AGREEMENT.
